Company Name

Team or Product Name

City, Province/State

Re: Application for [Internship Title] – [Job ID]

Dear [Hiring Manager Name],

I am a Master of Computer Science student at the Université de Montréal (graduating 2026) seeking a [season/year] [Internship Title] at [Company Name]. I have been following your work on [briefly name a product/initiative], and I am excited about the opportunity to contribute and learn from your team.

What I bring

- **Full-stack web experience.** At Arctic Star Foods, I administered and optimized PHP/MySQL web infrastructure (maintaining 99.9% uptime), built a custom product-showcase web app, and integrated billing and order systems to streamline operations. Stack: PHP, MySQL, HTML/CSS/JavaScript, React, Docker.

- **Data/ML and product sense.** In my NHL Data Analyzer project, I collected and cleaned data from public APIs, trained models to forecast game outcomes and goal accuracy, and built a real-time web app for visualization. Tools: Python, pandas, scikit-learn.

- **Quality and automation mindset.** As a QA Engineer at Keywords Studios, I created automation tools in Python and VBA to reduce manual testing, partnered with studios like Warner Bros., Ubisoft, and 2K, and delivered feedback that improved user experience.

Across my coursework and projects, I am comfortable with C++, Python, Java, SQL, React, and Docker, and I value good engineering practices—version control, readable code, and pragmatic testing. I learn quickly, communicate clearly, and enjoy shipping features in collaborative environments.

I am available to start [Start Date] for [Duration] in [Location/Remote preference]. I would welcome the chance to discuss how my background can support [Team or Product Name] and [Company Name]'s goals. My resumé is attached, and code samples are available on GitHub.

Thank you for your time and consideration.

Sincerely,

Yihang Huang
